

Assessment-

task1. List all Countries and customers related to these countries. For each country displaying its name in English, the name of the city customer is located in as well as the name of the customer. Return even countries without related cities and customers.

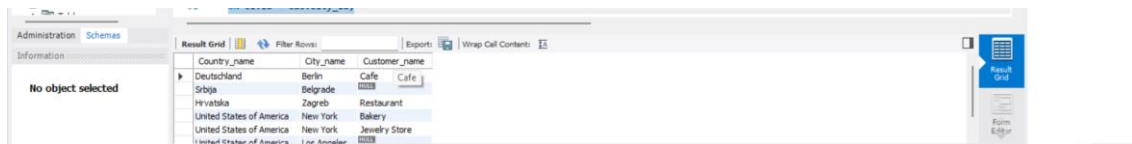

```
SELECT cou.Country_name,ci.City_name,cus.Customer_name
FROM Country cou
LEFT JOIN City ci
ON cou.id = ci.Country_id
LEFT JOIN Customer cus
ON ci.id = cus.City_id;
```

Country_name	City_name	Customer_name
Deutschland	Berlin	Cafe
Srbija	Belgrade	Cafe
Hrvatska	Zagreb	Restaurant
United States of America	New York	Bakery
United States of America	New York	Jewelry Store

task2.Return the list of all countries that have pairs(exclude countries which are not referenced by any city). For such pairs return all customers. Return even pairs of not having a single customer

```
SELECT cou.Country_name,ci.City_name,cus.Customer_name
FROM Country cou
INNER JOIN City ci
ON cou.id = ci.Country_id
LEFT JOIN Customer cus
ON ci.id = cus.City_id;
```

Country_name	City_name	Customer_name
Deutschland	Berlin	Cafe
Srbija	Belgrade	Cafe
Hrvatska	Zagreb	Restaurant
United States of America	New York	Bakery
United States of America	New York	Jewelry Store
