

Assessment-

task1. List all Countries and customers related to these countries. For each country displaying its name in English, the name of the city customer is located in as well as the name of the customer. Return even countries without related cities and customers.

```
SELECT cou.country_name, ci.city_name, cus.customer_name
FROM country as cou
LEFT JOIN city as ci
ON cou.country_id = ci.country_id
LEFT JOIN customer as cus
ON ci.city_id = cus.city_id;
```

country_name	city_name	customer_name
Germany	Berlin	Customer A
Croatia	Zagreb	Customer B
USA	New York	Customer C
Spain		
Russia		

task2. Return the list of all countries that have pairs(exclude countries which are not referenced by any city). For such pairs return all customers. Return even pairs of not having a single customer

```
SELECT cou.country_name, ci.city_name, cus.customer_name
FROM country as cou
INNER JOIN city as ci
ON cou.country_id = ci.country_id
LEFT JOIN customer as cus
ON ci.city_id = cus.city_id;
```

country_name	city_name	customer_name
Germany	Berlin	Customer A
Croatia	Zagreb	Customer B
USA	New York	Customer C
